Subject: Attention Council Members of the Town of Goderich

Attention Council Members,

I am in the Ottawa area, but have family members in Goderich (Wagler's).

It has come to my attention that your Municipality has voluntarily become a member of the Partners for Climate Protection (as of 2020), likely erroneously thinking this was a good idea and to your benefit.

Some of the supposedly "Green projects" that have been advertised as Green and environmentally friendly are actually quite destructive and financially draining as shown here:

<https://www.americaoutloud.news/industrial-wind-turbines-are-destroying-rural-wells/>
(harms from infrasound can be quite harmful too and can, if I remember correctly, can negatively affect the population up to several kilometers away in every direction)

Why is Canada trying to reduce CO2 emissions at the Municipality level? Net Zero makes ZERO sense. Please have a look at the CO2 facts here:

<https://co2coalition.org/facts/>
(members of this group include some very knowledgeable scientific minds with PhD's in Physics and Biology etc..... in contrast our P.M. who is pushing for CO2 reductions has a degree in Drama I believe)

https://gather2030.substack.com/p/there-is-no-climate-change-emergency-826?utm_medium=reader2
(there will however be an energy deficit and economic emergency perhaps if common sense doesn't prevail sooner rather than later)

Here is some information on the 17 UN Sustainable Development Goals that you should know:

<https://unlimitedhangout.com/2022/09/investigative-reports/sustainable-debt-slavery/>

It may make sense to bring forward a motion to rescind the membership with the Partners for Climate Protection, because this membership may ultimately NOT be in the best interests of the citizens in your Municipality.

The UN (and WHO) I might add are also encouraging the adoption of a Comprehensive Sexuality Education as described here:

<https://principia-scientific.com/children-targeted-by-who-standards-for-sexuality-education-in-europe/>

It sort of seems like the goal here is to normalize and perhaps make legal pedophilia, which is NOT ok with me...(fyi - just under 50% of those diagnosed with autism are convinced to accept gender affirming care and as you likely know autism numbers are increasing... there is evidence to suggest rising autism numbers are linked to vaccinations)

My second point is, that it would make sense to me for Canada to disengage from the UN (and the WHO Pandemic Treaty)
