Subject: Paid parking at MVMHC

Did any of you consider the impact this would have on Michael's Pharmasave parking or other renters of that building? Also, \$3? Have any of you assisted a senior who is on a tight budget? My friend recieved an increase of \$4 from 2024 to 2025 per month from the gov't. If you need to make money ... try spending less money ... This sentiment comes from my coffee group (and others in the restaurant). If you feel you have to charge, charge a dolllar. You will not look so greedy, still make money, not fill up Michael's parking lot with cars that are not his customers and not bankrupt people (seniors or low income) that have to visit a doctor or the lab frequently. With everything that is going on right now, I find this shameful for what was once our little pretty town. We are not the city.
